Createspace Independent Publishing Platform, United States, 2012. Paperback. Book Condition: New. 274 x 211 mm. Language: English . Brand New Book ***** Print on Demand *****.Much has changed in the overall operational environment in the past few years. The character of contemporary conflict has driven a significant shift in the US approach to warfighting. The large-scale, complex, force-on-force scenarios that drove much of Cold War planning, and were executed in Operation DESERT STORM and the opening stage of Operation IRAQI FREEDOM are now viewed almost as the exception, replaced by the careful, precise, and relatively measured pace of irregular warfare against nontraditional enemies. Adversary capabilities may range from long-range, precision-guided attacks to explosive vests worn by suicide bombers. The threat of mass destruction from chemical, biological, radiological, and nuclear weapons will likely expand from stable nation-states to less stable states and even non-state networks. These changes have significant, long-term implications for the planning and conduct of US operations: The need for current, precise, and detailed analysis requires a continuing expansion in the scale of information collection and processing; networks are as important as a single bullet or bomb. Sensors, shooters, and fusion centers are routinely interconnected worldwide to achieve a unified battle rhythm, and Threats against the US homeland will increase. The United States can expect future opponents to launch both terrorist and unconventional attacks on the territory of the United States. Civil, military, and industrial cyber networks have already seen an upswing in probes, intrusions, exploitations, and attacks. The proliferation of commercially available technology will allow adversaries to develop niche capabilities that will threaten, in varying degrees, the successful conduct of operations in areas where US forces were previously unchallenged. Space and cyber networks are increasingly vulnerable to a wide array of new threats. Adversary anti-access capabilities will continue...
