

## LArt de Connoître Les Hommes

Filesize: 6.05 MB

### ***Reviews***

*It is great and fantastic. I actually have read and so i am certain that i am going to going to go through once again yet again in the future. I realized this ebook from my dad and i encouraged this book to find out.*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 158 pages. Original publisher: Cleveland, Ohio : NASA Lewis Research Center, 1987 OCLC Number: (GPO)apn1992-042701 Excerpt: . . . GAS TURBINE DIVISION I Allison General Motors Corporat, on 2. 0 INTRODUCTION Prop-Fan propulsion system technology was reviewed extensively in the NASA sponsored Advanced Prop-Fan Engine Technology ( APET ) Definition Studies ( Ref i ) performed by three major U. S. gas turbine engine manufacturers--Allison, Pratt and Whitney, and General Electric. All three studies identified the po-tential fuel savings of Prop-Fan powered aircraft compared to turbofans of the same technology level. As a part of that study, technology needs were evalu-ated for purposes of defining the technology needs of production model Prop-Fan propulsion systems of the early 1990s. The conclusion from the APET study was that a major gearbox technology project is needed to develop long llfe, low maintenance gearboxes suitable for commercial airline service. An immedi-ate response to this recommendation was an extension of the APET study to pro-vide an in depth look at single rotation and counterrotation gearboxes and Prop-Fan pitch change systems in the i0, 000 shp power class. These prelimi-nary design activities identified design features that would significantly contribute to achieving the long life low maintenance objectives. This work ( Ref I ) became the starting point for major technology verification programs Jointly sponsored by NASA and industry. Allison began the AGBT program with NASA in August 1984 with the goal of test-ing an advanced technology gearbox in a rig configuration with as many tech-nology features as practical in the initial test hardware. Technology verifi-cation was to be accomplished in a full-scale counterrotation gearbox that would have the potential to accommodate various gear train types. The program was structured to allow approximately one year...
