Createspace, United States, 2011. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.Java is a programming language originally developed by Sun Microsystems in 1995. Nowadays, Java is widely used in various fields. This book is to introduce how Java is being used in academia and research. This book is suitable for advanced undergraduate students and postgraduate students. It takes a practical approach rather than a conceptual approach. It offers a truly reader-friendly way to get to the subject related to the semantic web, making it the ideal resources for any student who is new to this subject and providing a definitive guide to anyone in this vibrant and evolving discipline. This book is an invaluable companion for students from their first encounter with the subject to more advanced studies, while the full-color artworks are designed to present the key concepts with simplicity, clarity and consistency. Content of this book: Chapter 1 gives a detailed overview on Java. Chapter 2 considers the problems and the solutions that are concerned with the extension of Java with Higher Order mechanisms: that is methods as parameters and closures. Chapter 3 proposes a method that supports to merge duplicate code into a single module. Chapter 4 describes an ongoing effort to develop a highly-automated approach for migrating Java source-code, such as standard class libraries, to restricted JVMs. The resulting code migration tool is called Monarch Chapter 5 proposes a framework for command processing in Java/Swing programs based on the model-view-controller (MVC) pattern. It supports centralized exception handling, premature command termination, pre- and post-processing of commands, undo/redo based on event objects and model listeners, and generic undo/redo commands. Chapter 6 discusses the software complexity to ensure the Quality Assurance of software. Software metrics have been found...
